Portfolio overview

Fall 2026

The TruHearing 7 BTE LI is made for real conversations.

TruHearing 7 hearing aids come equipped with a multi-stream architecture capable of accurately pinpointing multiple moving speakers in real-time conversation.*

We developed the TruHearing 7 platform by leveraging our deep understanding of dynamic conversations, including head movements of the wearer and changing positions of speakers. This groundbreaking technology ensures uninterrupted conversation engagement in noise, addressing a critical challenge many hearing aid wearers face.

The new TruHearing 7 BTE LI: rechargeable, powerful, and easy to connect.

The new rechargeable TruHearing 7 BTE LI is engineered to reduce background noise and keep wearers engaged. Your patients will experience significant improvements in every conversation.

For your patients with tinnitus, three strategies are available to provide relief.

World's first Tinnitus Notch Therapy

Static Noise

Ocean Waves

Keep your patients connected with a hearing aid that increases engagement and reduces background noise.

With this new rechargeable BTE from TruHearing, it's never been easier to get back in the conversation. Your patients will enjoy the simplicity of a comfortable, powerful hearing aid that's made to help them reconnect, no matter the level of hearing loss. Users will experience significant improvements in every conversation with the TruHearing 7 BTE LI, designed to enhance speech in noisy environments.
